SERVICES | Teaching **29 April 2020**

American Advanced Institute of Technology offers:
Computer Software, .Net & ASP Applications
The tech industry is booming!
Now is the perfect time to learn developer skills and get the best tech jobs in the industry.
Software Developer and Data Administrators are most In-Demand Jobs for the New Decade
Average Beginner's Salaries, 2019: $50K-$70K
BLS Job Outlook, 2018-2019: 21% (much faster than average)
Software development is one of the most versatile tech jobs.
If you're interested in this thriving field, join AAIT "Computer Software, .Net & ASP Applications " Program that gives you hands on skills. More and more tech companies and other employers are becoming less interested in applicants having college degrees in computer science. Instead, many employers focus on the need for practical experience in developing software applications.
In only 9 months you will acquire:
- Knowledge of multiple programming languages
- Analytical and technical skills
You will be proficient in designing, developing, installing, testing and maintaining software systems; coding, designing and building applications, websites or mobile apps, working with multiple programming languages such as C#, MVC, HTML, JavaScript, jQuery, Angular, ASP.NET and SQL Server. You will learn to understand client requirements and be able to provide recommendations for improving web, software and mobile applications to ensure they meet user needs.
Email or call us today to sign up before all the seats are gone.
