JOB SEARCH | Construction Work **10 February 2022**

Looking for a job as a Project Manager for a construction company.
I can measure for and order the materials, set up the job (schedule and receive material delivery, dumpster, toilet), control daily the mechanics working on the job(s), talk to the homeowners or builders, and interface between workers on the job site and GC.
For 10 years I was a mechanic myself, and this is why I know the practical installation procedures for siding (also Hardie Plank), asphalt roof, replacement windows, bending the aluminum and copper shapes (fascia, window casings, etc.), demolition and more.
Then for 12 years I operated my own construction company in Princeton Area, mostly installing HP fiber-cement siding on the residential homes with my 6 crews.
I also know how to properly set up the heavy equipment (scaffolding, planks, power tools, generators, etc.), how to comply with OSHA safety regulations.
I have 2 years of experience working for Toll Brothers controlling remediation projects on two-million-dollar homes in Pa.
I speak perfect Polish and English.
Please call.
