JOB OFFERS | Construction Work **16 April 2022**

We are a solar installation company that is growing and looking for some experienced installers to join our team. We pay a piece rate, meaning compensation is per job, so the more efficient you are the more you can make. Looking for someone with experience in being a solar roof lead, majority of our work is residential for the moment with a commercial job here and there. We do a lot of jobs that use racking and we primarily do not do jobs north of Edison, NJ but cover the entire central and southern parts of NJ. We will possibly be picking up contracts in eastern PA (buck county area). We currently have 2 channel partners giving us work and have onboarded another 2 just recently. With the solar industry on the rise we are looking for quality employees to grow with us.

Michael, Central/Southern New Jersey
