Buy Caluanie Muelear oxidize & Red Mecury WhatsApp: +447401473736

Caluaine Muelear Oxidize is one of the most demanded products in the metal or chemical processing sector, This product is used for crushing and processing precious metals and semi-precious stones. It is used for processing precious and semi-precious stones, crushing metals in the chemical industry. this makes it easier to break nails with bare hands after 10-20 seconds of immersion. Heavy water changes the properties of the metal, making it brittle. But at the moment of evaporation of heavy water, the rock returns to its previous state.

-Designed for reusable use
-Shipping: Worldwide Delivery
CONTACT IF INETERESTED

We supply other chemicals as well such as SSD, MECURY,

Mercury metal (from latin hydrargyrum = liquid silver) is shiny and silvery and the only metal that is liquid at room temperature. Mercury metal is known since ancient times, when it was believed to be something magical and also a cure for everything. More recently Mercury metal was and still is used in thermometers and barometers and in amalgams as filling for our teeth. Elemental mercury and many of its compounds are very toxic, so it should be avoided and not be used, if there are alternatives. Mercury metal can be sold only in small quantities and perfectly sealed for laboratory or display use. CONTACT IF INTERESTED
