I am a young energetic man with a seven year experience in construction. I am currently in my fourth year of architecture, therefore I know how to read construction plans. I have permission for work, and all needed documents. I have a lot of my own tools and my own car. I worked a lot in repairs as well as finishings of new and old houses. I specialize in carpentry, trimming/framing and I also have experience in installation of doors/windows, kitchen cabinets & vanities, design & production of custom cabinets/shelving (such as wine storage, furniture, etc) trim, framing, roofing, wooden siding, stair railing, fireplace mantles, exposed framing/beams, on-site cast concrete, basement drying, sheetrock/space, and painting/texturing/faux glazing. I worked previously for McGrath Real-estate, Brooks brothers, Princeton University(Tiger Club Inn) and took part in Extreme Makeover Home Edition in Langhorne, PA(http://abclocal.go.com/wpvi/story?section=news/local&id=8403327). With questions or offers please call. If you would like to see pictures of my projects please send me a request with your name and telephone.
