IT Supervisor / serviceman with about 15yrs practical experience in trade is looking for work
Advanced in implementation, configuration, securing, and administration of networks, software and systems (including access control, detection of intrusion and CCTV)
Advanced administration of LMS - info 'bout it can be found here: http://www.lms.org.pl/?lang=en
Very advanced knowledge of configuring and administration of Windows OS (up to Win10, except server editions)
Medium knowledge of Linux (still practiced on Xubuntu and Debian)
With experience in 1-st line support (helpdesk)
Medium knowledge about protocols, layers
Medium knowledge about backup systems
Basic knowledge in using Kali/BackTrack Linux tools
Basic knowledge of VMWare solutions
Basic skills in 2D graphics (can do simple projects like business cards, advertising folders, non advanced websites)
Basic knowledge of PHP, CSS, HTML
Knowledge of solutions that enhance the security of information
Advanced in servicing computers and peripherials

You can call me almost-geek. Why "almost"? Simple - I don't have specialization yet BUT I like security measures and in future I would like to work as a part of intervention group in cybersecurity squad

Got my own company so we can work in B2B relation on my non-immigrant B2 Visa. Actually I live in Poland, but in any moment can travel to USA. Got driving license for cars and motorbike's (if needed)

Tomasz Stencel, Whole US
