Small Business Consulting/Help - Slovak/Polish/Czech

I have several years of financial and management experience and I am looking to share my expertise and experience with small businesses in the area as a consultant.

I have comprehensive financial analysis skillset which I developed through my role as financial analyst/portfolio manager on Wall Street – I am a CFA charterholder. I can help you evaluate current financial situation of your firm (capital allocation, asset utilization, liquidity, capital expenditures, cash flows, etc.) and help you understand future financial requirements of your business based on growth, industry trends, and other investment decisions.

In addition, I have several years of managing and running businesses (operations, marketing, sales, an HR). In the past, I was able to help businesses save time and money by leveraging technology and customized programming to improve workflow and automation.
In addition to my financial analysis and management experience, I can consult on various projects: technology implementation, Quickbooks, programming, mobile app & web development, financial controls, asset purchases, etc.

I can be reached via email at marekbusinessconsulting@gmail.com or (347) 687-4483. Compensation negotiable based on the project scope.
