

I have adorable 12 weeks old Maltese puppies I have a male I also have a female. they need to be rehomed I have several dogs of my own and have to move and not able to have more than 3 in an apartment they're very adorable and Angelic will cuddle with you if you have a mice or rat problem are very good at keeping your house clean as rats and mice breed disease dogs are very good about keeping them away from your home or getting rid of them for you so that's a plus they're also very family-oriented indoors they like to play Outdoors if you ever yard they are in excellent health and condition I gave them high quality pet food and they are very nice only rehoming because I already have to and was in a home and now going to an apartment. Please help they would make a loving pet and I don't want them to wind up in the shelter they're too precious they are cage-free I don't believe in having animals in cages. :) they should be allowed to roam free,I am asking a rehoming fee please feel free to text me and I can send more pictures.....
