JOB OFFERS | Office Work **26 October 2018**

Attention! - Programming class only for smart & ambitious people who want to get an office job paying $40k to $65k / year.
This class is not for everyone - only for those who are ready to work hard for 9.5 months and start a new successful career. Commit yourself to 4 nights a week of immersive software development and database administration projects and you will get the essential skills you need to land a job tomorrow in a format that works for your life!
We teach the fundamentals of programming to make sure you learn how to learn. Then, we layer on the most useful tools, frameworks and languages to build your skills to match any junior developer or database administrator.
HTML, CSS, JavaScript, Twitter Bootstrap, Angular, jQuery, Python, Postgres, MongoDB, Flask, Jinja, SQlAlchemy, Unit Testing, Project Management and much more.
More information is available per further inquiry – 267 840 9000
2 classes available starting in November 2018
1. .Net Software Development (C#, ..Net, ASP.Net, WinForms, JavaScript, ADO, HTML, XML, AJAX, MVC, SQL Server and more)
2. SQL Server development and DBA (T-SQL. SSIS, SSRS, Performance tuning, Security, DBA and more)
Small groups with up to 10 seats per class, $12,500 per class.
605 clock hours over 9.5 months (18 hours / 4 times a week)

Due to high demand and low seat capacity class seats are reserved upon a deposit payment on a first come first served basis.
Email or call us today to check if the seats are available.
