

My name is Anna. I came to this country 3 years ago with plans of making the USA my home. I'm fluent in both polish and english. I decided to become caregiver because I love people. My philosophy of care is the following: be very attentive, never assume anything, maintain a positive attitude with the person you caring for. I believe in helping people attain the highest possible level of independence within their natural environment which is their HOME.

My most recent experience was as a live-in caregiver for 87 year old gentelman. My resposibilites included: meal preparation, personal grooming including full diapering and changing the colostomy bag, bathing, dressing, etc. I served in this capacity for 6 months and within that time we not only become great friends, but his social and cognitive abilities increased dramatically.

I'm very selective about who I work for and I also expect that the families employing me will also be as selective as I am.

My rates are reasonable and my care is exceptional.

Best

Anna - CAREGIVER FOR SENIOR PEOPLE, Lawrenceville, NJ
